Kitty Keychain

Use PKI to Verify Wallet Owner

Use Blockchain to Lock-In Ownership and
manage additional wallets

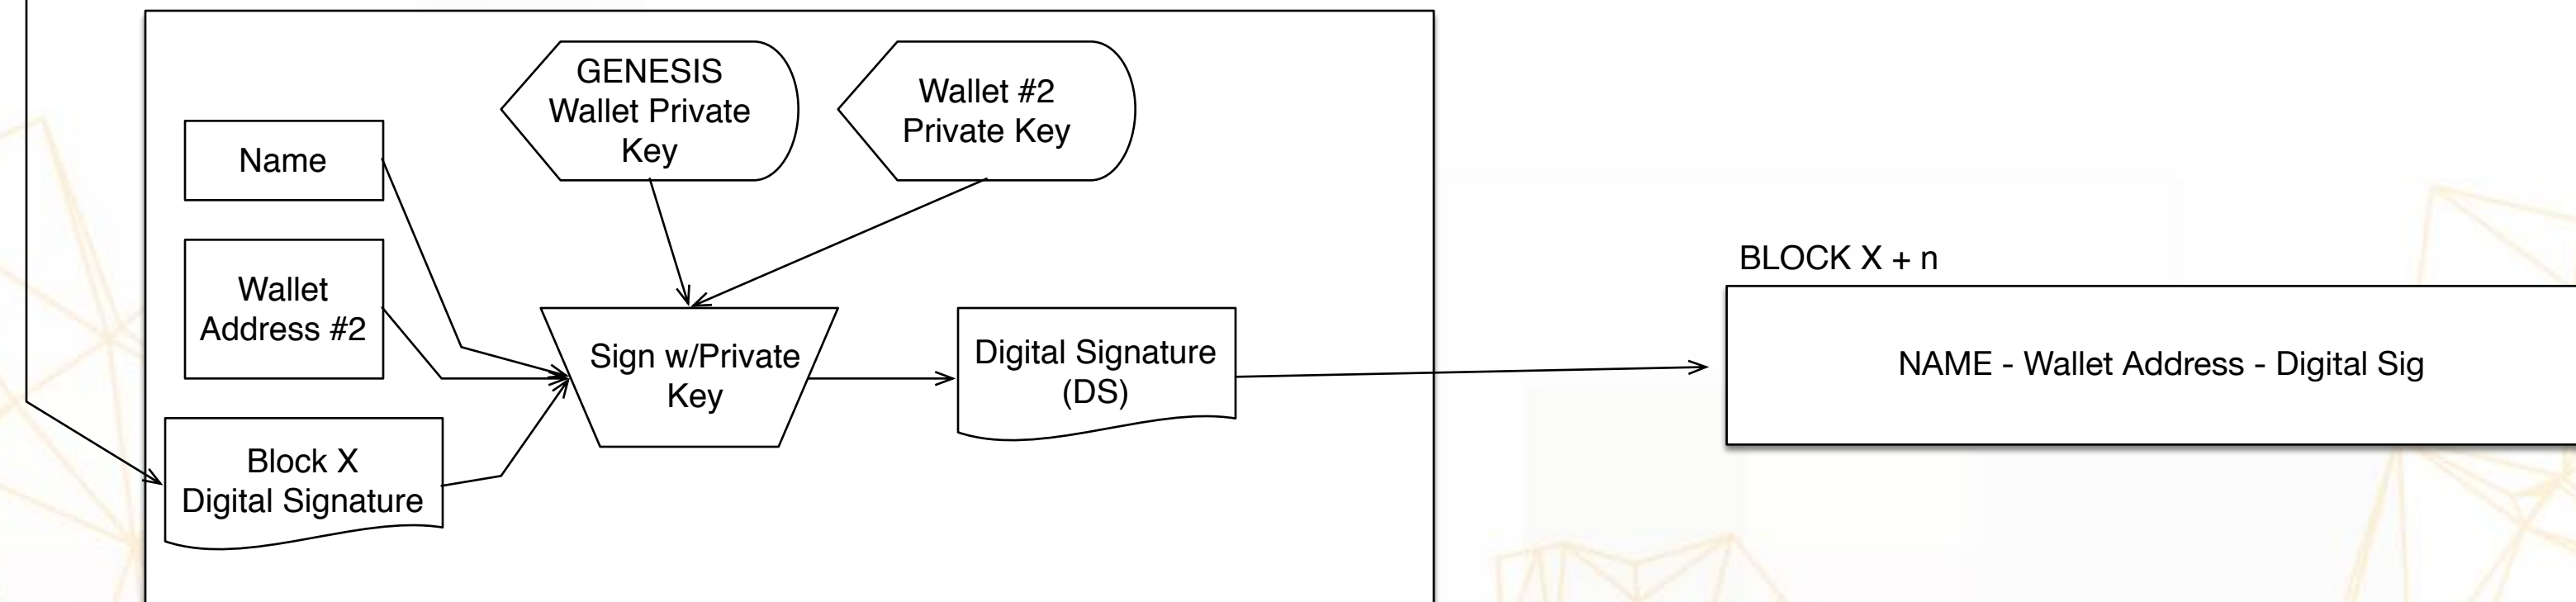

Role of Crypto & Blockchain

NAME GENESIS - Cryptographically Bind Name to Wallet

I've proven I own the Wallet and Locked my NAME into the Blockchain

ADDING WALLETS - Use the DS in block X to create a **cryptographically verifiable chain** of wallets in Block X+n

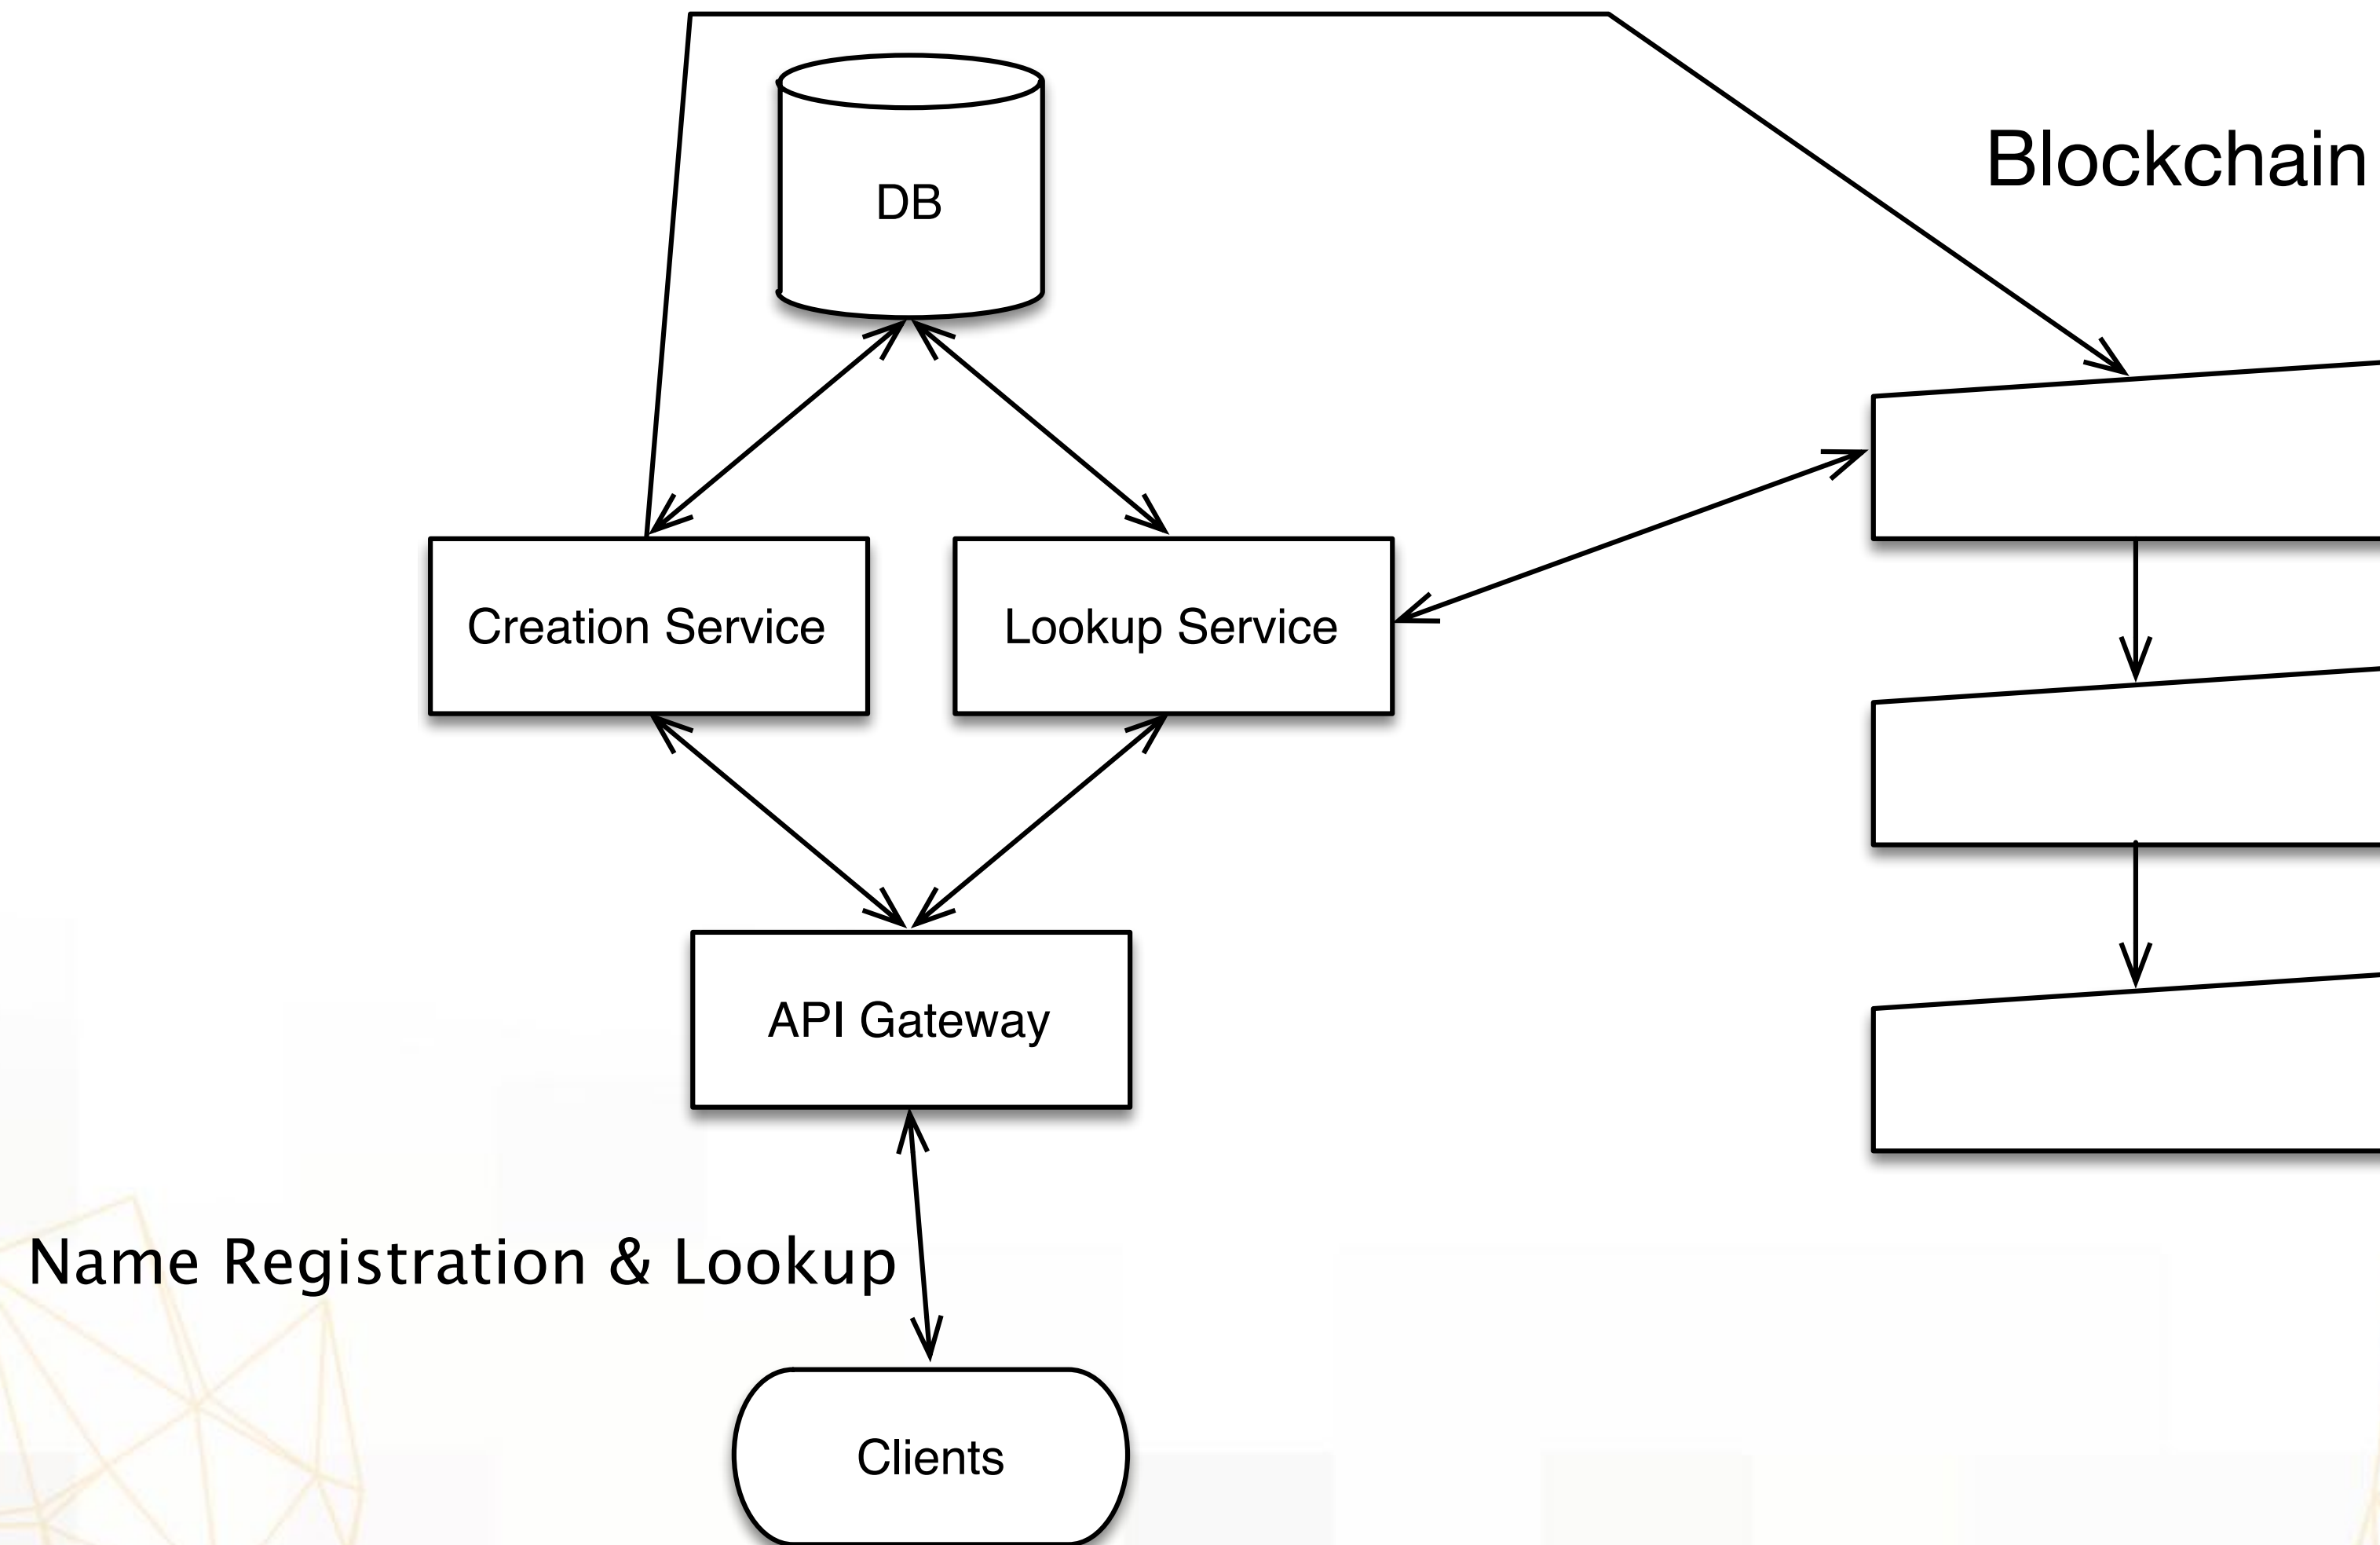

I've associated additional wallets with my NAME.

Kitty Keychain

When Sending, Others use Name, not
Address

We provide the API to create Names and
Perform Lookup

Demo System Arch

uName: SOLUTION

Name simplification a-la DNS

Neutral source for simple names and verification data

Across Currencies and Blockchains

Touch Points/Customers:

Grandma Managing her Crypto

Anywhere a transaction happens

Those who make money clearing transactions or sell software that enables payments

Advantage

Independent First Mover + AI + Network Effect = Dominant Market Position
